Auditorne vježbe iz predmeta

VJEŠTAČKA INTELIGENCIJA I EKSPERTNI SISTEMI

Una Drakulić, MA elektrotehnike
Viši asistent

Primjer 1

Razviti jednostavnu neuronsku mrežu koja na osnovu niza tekstualnih rečenica uči redoslijed i obrazac pojavljivanja riječi, te na osnovu naučenog modela generiše novu rečenicu koja logički slijedi dati niz. Ulaz u sistem je niz kratkih rečenica zapisanih u .txt fajlu. Svaka rečenica ima sličnu strukturu i pripada istom tematskom kontekstu. Neuronska mreža treba da nauči koja riječ najčešće slijedi nakon prethodne, te da na osnovu toga predviđa naredni tekstualni element.

Ulagani podaci

The screenshot shows a text editor window with the title bar 'sentences.txt'. Below the title bar are three buttons: a grey 'X', a white '+' with a blue outline, and a light blue button with a white border. The menu bar contains 'Datoteka', 'Uređivanje', and 'Prikaži'. The main text area contains the following ten sentences:

```
student uci programiranje
student uci matematiku
student uci elektroniku
student uci automatiku
student uci algoritme
student uci signale
student uci mreze
student uci robotiku
student uci vestacku inteligenciju
student uci masinsko ucenje
```

```
clc; clear; close all;

%% 1. Učitavanje teksta
fid = fopen('sentences.txt','r');
C = textscan(fid, '%s', 'Delimiter', '\n');
fclose(fid);
sentences = C{1};

%% 2. Ekstrakcija riječi
allWords = {};
for i = 1:length(sentences)
    words = split(lower(sentences{i}));
    allWords = [allWords; words];

Primjer 2

Razviti MLP neuronsku mrežu koja predviđa sentiment:

- 1 = pozitivna recenzija
- 0 = negativna recenzija

Tekst datoteka **reviews.txt** (20 recenzija)

*I absolutely love this product, it works perfectly and exceeded my expectations
The item was terrible, I am very disappointed and would not recommend it
Fantastic quality, I am very happy with my purchase and everything works great
This is the worst experience I have ever had, very poor design and functionality
I am impressed, excellent performance and perfect for my needs
Awful, it broke after two uses and I hate it
Good value for money, really satisfied with the product
Terrible service, the item arrived damaged and support was awful
I highly recommend this, fantastic and awesome product
I dislike this product, very bad quality and poor performance
Perfect, just what I needed and works as described
I am very disappointed, it did not meet my expectations
Great item, excellent design and I love using it
Worst purchase ever, terrible quality and I hate it
Amazing product, very happy with the results and recommend it
Poor build, bad materials and disappointing overall
I am satisfied, good quality and works perfectly
Awful experience, would never buy again
Fantastic, excellent, and perfect, very happy
Terrible, worst item I have bought, do not recommend*
